

DAT-1010-UT

AUTOMATIC ULTRASONIC SHOULDER STRAP WEARING BUCKLE COMPUTERIZED PATTERN MACHINE

Features

It can be used for clothing ingredients, backpacks, handbags, shoes and other special purposes

Mainly used for backpack shoulder straps, webbing, buckles and sewing.

Compared to traditional machines, products sewn by machines are more standardized and aesthetically pie

There is a shortage alarm in the system, which can preset the quantity of products and automatically shut down after completing the production

Technical Parameters

Specification	DAT-1010-UT
Air pressure	0.5-0.6 MPa
Power	1200W
Drive	Programmable system
Cutting angle	cut straight
Wolume	1100MM th 750MMHe ht 1450MM
Capacity	X-reinforced pattern with a capacity of 6-8 pieces per minute
Welta	AC220V
Cutting System	Auto frequency tracing ultrasonic system
Working System	Programmable system
Sewing	Computers
Working width	
Weight	280KG
