

DY EBS-MARK-2

DUKE

Automatic Chainstich Button Stitch Machine With Button Sewing & Button Wrapping

The DY EBS MARK-2 is a high-performance, computerized button sewing machine designed for precision, flexibility, and productivity. It is capable of sewing multiple types of buttons—including flat buttons, shank buttons, marble buttons, and stay (counter) buttons—making it ideal for garment manufacturers handling diverse production requirements.

Key Features and Benefits

Multi-Button Capability

Supports flat, shank, marble & counter buttons
Ideal for double-breasted garments
Dual button loader for two button types in one cycle

Smart Touch Control Panel

Touch LCD display with easy interface
Quick pattern selection & adjustments
Real-time monitoring for better efficiency

Data Storage & Connectivity

Supports USB & Compact Flash (CF)
Easy program storage & transfer
Ensures uniform production across machines

High-Speed Performance

Up to 1,800 sti/min (neck wrap)
Up to 1,200 sti/min (button sewing)
Delivers fast and consistent stitching

Flexible Pattern Programming

Stores up to 99 patterns
20 patterns (30 per cycle)
Adjustable settings: Spacing: 1.5 – 6.0 mm |
Neck wrap: 0 – 10 mm | Cross stitches: 2 – 64

Specification parameter

Model	DY EBS MARK-2
Stitch Type	Single-thread chain stitch
Application	Multi-type button sewing
Max Speed	1,800 sti/min (neck wrap), 1,200 sti/min (button)
Button Size (Without Neck Wrap)	Ø 8 – 38 mm
Button Size (With Neck Wrap)	Ø 8 – 32 mm
Counter Button Size	Ø 8 – 25 mm
Pattern Capacity	Max 99 patterns
Registered Patterns	20 (30 per cycle)
