## DY-896N/ DY-895N

### AUTOMATIC POCKET WELTING MACHINE

- The machine supports the sewing of straight pockets (with flaps) on suits, jackets and pants.
- Double-welt/single-welt sewing can be changed over by the simple touch of a key on the operation panel.
- Increased adjustable range of sewing lengths (min. 18mm to max. 220mm)

#### Increased productivity

In addition to the high-speed machine head with a maximum speed of 3,000 sti/min, faster movement (jump and forwarding) of the clamp foot achieves a shorter machine time.

1900 ~ 2300

Welting process without flaps

1900 ~ 2300 pcs/8hours

1600 ~ 1900

Welting process with flaps

1600 ~ 1900 pcs/8hours

## The corner knives are easily adjustable

The corner knives, which can be drawn out in the entire knife units adopted. The knives are easily adjusted and can also be changed with ease. The slim corner knife cover helps reduce material thrusting, thereby achieving material cutting with accuracy.

### ■ Newly developed stacker which is able to handle small articles

With the clamp bar stacker, the machine is able to handle materials with a shortest distance of 250 mm from its edge to the pocket. A stacking sensor is also provided as standard to prevent stacking errors.

### ■ Suction device (for sewing tables with separated right and left parts)

Option: the device improves the ease of the material placement by sucking the garment body.
