## Intelligent Vibrating Knife Cutting Machine

### Features

1510 Intelligent vibrating knife cutting machine, with projection and irradiation function, can choose different cutting tools to realize single-layer and multi-layer cutting. for small batches of genuine leather,pu,leather,cloth,fiber,for the cutting of composite materials, meshes and other materials, different cutting tools are selected for different materials. This machine is most suitable for sample room development and cutting of small batch orders.

## This product has the following functions

1. Equipped with a variety of cutting tools and pens, which can meet the cutting requirements of all kinds of different materials, and can achieve high-speed, intelligent and precise cutting, punching, drawing and other process requirements, and fully meet the customer's personalized cutting production.

2) Electric knife cutting machine One beam is equipped with a vibration knife or a pneumatic knife plus a punching line drawing tool, cutting, punching, and line drawing three in one function, saving materials, time and knife molds.

3) Software control system, support CorelDraw, Auto CAD and other software, support AI, PLT, DXF and other formats, support network, USB and other fast read and write file rates.

4) Intelligent typesetting software can optimize the processing path, calculate the length of the material used and the cutting count, saving labor and material.

5) The infrared positioning function allows the typeset materials to be quickly positioned within the effective cutting range, avoiding unnecessary waste of materials

## Machine Specifications

Specification	DY 1510	DY 1506
Max cutting area	1500 × 1000 mm	1600 × 600 mm
Size	2000 × 1760 × 1300 mm	2000 × 1400 × 1300 mm
Max speed	1200mm/s	
Accuracy	±0.1 mm	
Max Thickness of materials	40mm	
Motor	Servo	
Data format	DXF,HPGL	
Interface	USB or Internet port	
Dielectric adsorption	5 KW	
Overall power	Vacuum	
Power	220V/50HZ	
Weight	500 kg	600 kg
