

Direct Drive super High Speed Overlock Sring Machine

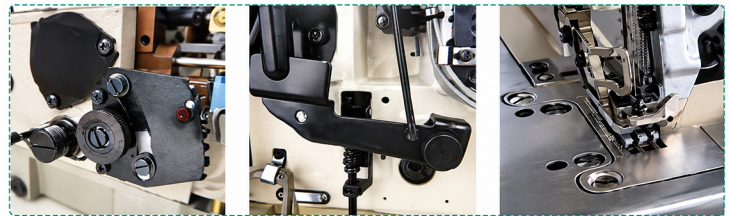

Description:

The Duke DY 6800 Series is a new generation Direct Drive Super High-Speed Overlock Sewing Machine designed for knitwear, underwear, casual wear, leather goods, and more. With a modern appearance and an embedded control panel, this machine combines advanced performance with a sleek, space-saving design. Its built-in direct drive motor delivers speeds up to 7000 rpm, while reducing energy consumption by over 60% compared to traditional clutch motors. Production efficiency increases by more than 30%, making it ideal for high-volume manufacturing.

Feature

This machine is equipped with pneumatic presser foot lift, Automatic needle setting Foot control swing arm forward and backward 180 degrees rotation, Manual adjustment of presser foot alternating amount, and reverse sewing. The shuttle bed has a thickness of 26mm and a width of 32mm, which is more suitable for turning inward corner sawing of small objects.
