

# DY 842D

## TWIN NEEDLE DIRECT DRIVE HIGH SPEED LOCKSTITCHER WITH NEEDLE POSITION

### Key Features

- Automatic head lubrication
- bottom & needle feed
- Quality robust construction
- Automatic hook lubrication
- Large vertical axis hook & bases
- Reverse stitch lever
- Quiet balanced head

### Technical Specifications

Specification	Details
Max sewing speed:	3000rpm
Stitch length:	0-7mm
Needle bar stroke:	35mm
Take up stroke:	74.5mm
Presser foot lift by hand:	7mm
Presser foot lift by foot:	13mm
Hook:	2x large Vertical type:
Lubrication:	Auto pump type

### Description:

The DY842D produces two lines of lockstitch sewing and features self-lubricated, large vertical-axis rotating hooks and bases, offering nearly twice the thread capacity of standard hooks.

The machine is equipped with a synchronized feeding system, where the needle bar and bottom feed mechanisms move in perfect timing. This stable motion helps prevent uneven material feeding and ply shifting, resulting in cleaner and more precise stitched seams.

All essential standard features are included, such as dial-adjustable stitch length, a reverse stitch lever, and a large hand wheel. Designed with modern engineering, the DY842D also incorporates an automatic lubrication system that continuously supplies oil to all critical moving parts.

Typical users of the DY842D sew shirts, uniforms, overalls, jeans, workwear, pants, and other medium-weight garments and fabrics, making it a dependable choice for professional garment production.
