

DY GC0318-1

DUKE

Lockstitch sewing machine with Top & Bottom Feed & Large hook

(Bottom feed & walking foot top feed)

- The DY GC0318-1 is a flat-bed style industrial sewing machine for use on medium & medium-heavy weight materials.
- It features a top feed walking foot and bottom feed system, with an alternating foot lift mechanism that is suitable to sew medium & medium-heavy weight materials such as leather, synthetics, canvas, plastics, PVC, webbing, tarpaulin + heavier than normal standard fabrics like upholstery or heavy weight curtains etc.
- The balanced sewing machine head benefits from automatic lubrication to reduce wear & tear, resulting in improved durability, lower noise levels, smoother running and minimal maintenance costs.
- The fitting of a large hook & base as standard, reduces the number of bobbin changes and helps when using the thicker threads associated with heavier than normal materials. A large stitch length is available up to 8mm.

- The heavy duty top walking foot mechanism combined with standard bottom feed; produces a positive feed action and allows true even stitching.
- Thick sewing needles are used from size 110 up-to the extra thick size 180.

Options:

- Various sewing feet sets
- LED needle light kit
- Energy saving servo motor.
- Needle position servo motor with speed and acceleration control.

Technical Specifications

Specification	Details
Max sewing speed:	2000rpm
Stitch length:	1-8mm
Needle bar stroke:	35mm
Presser foot lift by hand:	6mm
Presser foot lift by knee:	13mm
Needle size:	DPx17

Key Features:

- 1) Top & bottom feeding
- 2) Large Hook & base
- 3) Auto hook lubrication
- 4) Auto head lubrication
- 5) Reverse stitch lever
- 6) Large stitch feature up-to 8mm
