

Highlead GL13118-1

Blind Stitch Sewing Machine

Felling and Hemming operations

The Highlead GL13118-1 is a general purpose blind-stitch sewing machine for use on a wide range of materials.

The machine produces a single thread chainstitch, which on the outside of the fabric appears to be hidden. The blind-stitch depth is easily adjusted, via the control dial, to suit many types of fabrics.

A universal sewing equipment set is fitted to allow blind-stitching of various materials independent of weight (i.e. light, medium & heavy weight).

The sewing machine is used throughout the clothing industry: making men's & woman's clothing, +house hold textiles including curtains. It is versatile and of particular use were many different fabrics are used (i.e. alteration work).

The GL13118-1 is a smooth running machine making blind-stitching effortless and as well as sewing flat work, you can swing away the front plate to reveal a cylinder arm for hemming small garments, sleeves and the bottom of trouser legs etc..

Features:

- Smooth & quiet operation
- Adjustable stitch length
- Adjustable blind-stitch depth
- Top feed system
- Skip & no-skip selector
- Swing away plate
- Flat or cylinder arm work.

Specification:

- Max sewing speed: 2500rpm
- Stitch length: 3-7mm
- Presser foot lift: 8mm
- Needle size: LWx6T 11-18
