

线迹稳定 美观

STITCH STABLE AND BEAUTIFUL

主要买点 Key Buying Points

科学改良底线夹线结构，夹线的效果显著提升，降低了起针脱线或线迹不良的概率
Scientifically improving the bottom line clamp structure, The effect of wire clamping is significantly improved, Reduced the probability of needle detachment or poor stitching.

特殊工艺加工处理的齿轮和凸轮，大幅度降低了机器噪音及震动，舒适度显著提高
Special process processed gears and cams can reduce machine noise and vibration significantly. And improved comfort of the operators.

功能 Functions

改良气缸优化改进的便携式气管接口，即插即用，用户外接气源更简便
Improved cylinder optimization and portable tracheal interface, plug and play, more convenient for users to connect external air sources.

跳针减少，针脚不紧密的概率降低，缝纫能力大大扩展
The percentage of the stitch skipping and loose pins problem reduced a lot. Greatly expanded sewing ability.

图案的精确性更高
Higher accuracy of patterns
