

新一代智能缝纫平台 ——无须模板的模板机

NEW GENERATION OF INTELLIGENT SEWING STATION
TEMPLATE SEWING MACHINE WITHOUT TEMPLATES

主要买点 Key Buying Points

一人可看管 5 台及以上 (全自动功能)
One operator can take care 5 or more sets of equipment. (full auto function)

相较通用模板缝纫机, 每台每年节省 1.5 万元人民币模板等综合费用
Compare with the general template machine, the working station unit machine can save \$2150 per-year by calculating comprehensive cost such as the templates.

功能 (通用模板机难实现的功能价值)

Function (Functional value that cannot be achieved by Normal template sewing machine)

双旋梭换向, 正反正线迹一致; 无需空移浪费
The double rotary shuttle is reversed, the positive and negative stitches are consistent, and there is no need to waste empty movement.

1 倍小旋梭, 减少断线机率, 自动换梭, 实现不间断高效作业
1 times the small hook, reduce the probability of thread breakage, automatically change the shuttle, to achieve uninterrupted and efficient operation.

可缝纫裁片封闭边缘线, 不需要增加工序在平缝机上人工缝纫
Can sew pieces with closed edge seam, no need extra process with lockstitch machine by manual sewing.

上下分别剪线并夹住线头功能, 起针不脱线, 线头小于 5mm, 不需要修剪线头
Trim threads up and down separately, and thread clamping function, No skip thread when start sewing. Thread tail less than 5mm, no need thread cutting in further.

投影图形摆放定位裁片
Projection graphics placement and positioning of cutting pieces.

相较现有模板 a 占地面积减少 1/3 以上
Compared with the existing template machine, the floor area is reduced by more than 1/3.

可匹配自动摆放裁片机, 实现无人化作业
Can be matched with automatic placement cutting machine, Realize unmanned operation.

新一代智能缝纫平台
THE NEW GENERATION INTELLIGENT
SEWING WORKING STATION
