

防错层

AVOID MULTI-LAYER

主要买点 Key Buying Points

旋钮式送布结构：缝制易滑面料不错层，制品品质美观
Knobs type feeding adjusting structure: avoid the layers spiting during the slippery stitching, high quality performance

一体化新升级：一体化设计，提升软硬件性能与缝制品质
Integrated new upgrade: integrated design, improve software and hardware performance and sewing quality

控制更准确，可实现个性化设定停车点
Control more precisely, realizing personalized stop points

功能 Functions

轻便：一体化设计便于运输与安装
Light: easy to transport and installation

更亮：搭载 LED 灯实现大范围照明
Brighter: LED can cover large scale

采用直驱伺服马达，响应速度敏捷
Adopt to direct drive servo motor, have fast response
