

## JT-A37

### 第五代全自动开袋机

The fifth generation Automatic welting pocket machine

#### 功能概述 Function overview

1. 操作简单, 无需熟手, 上手速度快。
2. 开袋一次成型, 无需人工翻袋压线, 效率高。
3. 缝制口袋速度: 20-45秒/个(视工艺及工人摆料速度而定)。
4. 机针配有中压脚装置, 稳定高效, 线迹更美观, 避免断针跳线等故障。
5. 折料方式: 外部折料结构设计, 适合更窄的口袋开袋。
6. 缝制口袋尺寸范围: 宽度: 8-40mm 长度: 100-280mm。
7. 一体式循环托料盘结构, 稳定安全可靠, 避免撞板故障。
8. 微电脑调试功能, 厚薄面料轻松切换, 无需手动调试夹具, 快捷高效。
9. 内压框双向独立压料, 保证折料止口稳定标准。
10. 贴合台面折料, 结构稳定可靠, 避免频繁调机。
11. 摆料区空旷, 视线不受阻挡, 操作更舒适便捷。
12. 吸风免烫装置, 摆放裁片定位准确、效率高。
13. 适用类型: 假袋、单唇袋、双唇袋、拉链袋、拉链包头袋等

1. Simple operation, no need to be familiar with the hand, fast speed.
2. Open the bag once forming, no need to manually turn the bag and press the line, high efficiency.
3. Sewing pocket speed :20-45 seconds/piece (depending on the process and the worker's speed).
4. The needle is equipped with medium pressure foot device, stable and efficient, and the stitch is more beautiful. Avoid faults such as broken pins and jumpers.
5. Folding method: external folding structure design, suitable for more narrow pocket opening bag.
6. Sewing pocket size range: width :8-40mm length :100-280mm
7. Integrated cycle tray structure, stable, safe and reliable, avoid plate failure.
8. Microcomputer debugging function, easy to switch thickness fabric, no manual debugging fixture, Fast and efficient.
9. Internal press frame bidirectional independent press, to ensure the stability of the folding edge standard.
10. Fit mesa folding material, stable and reliable structure, avoid frequent machine adjustment.
11. The layout area is empty, the sight is not blocked, and the operation is more comfortable and convenient.
12. Suction non-ironing device, placing the cutting pieces accurate positioning, high efficiency.
13. Applicable type: fake bag, single lip bag, double lip bag, zipper bag, zipper bag, etc
