

LOIVA

LA 50XH

Automatic Tape Cutting Machine

Introduction

The Loiva LA50XH automatic cold and hot knife is a very useful device which is perfect for cutting strips of material to a specific size. Required settings can easily be inputted and changed via the easy-to-use buttons and digital display screen. They will also be saved automatically before the machine is turned off, so you can start work again straight away without having to set it up again. This machine cuts through materials such as braided tape, belt loop, plastic tubing, plastic zippers, electrical wires, labels, etc. neatly and efficiently. The hot knife function has the added benefit of sealing the edge on woven materials as it cuts to prevent fraying.
