## Description

### Intelligent Mouth Rip Machine LENSH LS-7051

Ribs or Cuffs are an indispensable part of Hoodies, Sweater Shirts, Sport Pants. The cuff or ribbing serves to main objectives:

1. Helps retain body heat that would otherwise escape out the open ends of the sleeves or prevent a chilly breeze from blowing up an open cuff when you reached for something.
2. Without a ribbed cuff to keep the fabric clinging to the wrist, the end of the sleeves would constantly be getting bent back and pushed up every time you tried to put on a jacket or coat. In short order, the cuff would look deformed and unsightly.

## Advantages

- Merging 2 processes into 1
- Reduce cycle time from 18~25s/pcs to 3.5s/pcs
- Save labor, 1 operator can control 3 machines
- Nonskilled workers required
- Stabilize line out (shape, size)
